Subject: Cannery property traffic studies

Thank you the information from the traffic studies. I understand there is concern with the accuracy of these studies. As a person particularly concerned with traffic on lower Lincoln Street (I live at 22296 SW Lincoln St), I did my own traffic survey of the intersection designated as #14 (Oregon St @ Lincoln St) on the DKS survey, and identified as Exhibit E2 in the City Report. My survey was conducted from 4 pm to 6 pm on Thursday, January 28th; and from 6 am to 8 am on Friday, January 29th, 2010. My results are as follows:

4pm to 6 pm: 105 vehicles south bound (compared to 48 on the DKS survey)
47 vehicles north bound (compared to 22 on the DKS survey)

6 am to 8 am: 16 vehicles south bound (compared to 25 on the DKS survey)
99 vehicles north bound (compared to 56 on the DKS survey).

Three out of four of these comparisons show wide disparities, which makes me question the accuracy of the surveys.

Thank you,

Joe Martin
