

90 by 90 Industrial Custom O&M Offer

Energy Trust of Oregon wants to help you eliminate energy waste, reduce operating expenses and improve productivity.

The 90 by 90 Industrial Operations & Maintenance Offer provides free technical assistance to identify and analyze low-cost O&M efficiency measures at your site. Complete your project within 90 days of the custom incentive offer and your cash incentive will be 90 percent of installation cost, with an incentive cap of \$0.08 per kilowatt hour and \$0.40 per annual therm saved. After 90 days, the incentive will return to the standard rate of 50 percent. Talk to your Program Delivery Contractor, PDC, to explore your facility's O&M opportunities and take advantage of this offer.

Take control of your energy costs. To learn more, contact your PDC or call **503.445.2956**.

Serving customers of Portland General Electric, Pacific Power, NW Natural and Cascade Natural Gas.

Savings from industrial O&M can rapidly reduce site energy use by two to 10 percent, with little or no upfront expense. Energy Trust contractors can help you increase the operational efficiency of compressed air, refrigeration, fan, pump, and other systems through O&M measures such as:

- Eliminating leaks
- Scheduling of equipment
- Tuning and optimization of controls
- Reducing and consolidating loads
- Adapting improperly sized equipment
- Repairing sensors
- Rebalancing exhaust
