

344 – Hwy 99W Pedestrian Overcrossing Professional Engineering Services RFP

DATE: June 15, 2021

BID ADDENDUM NO. 1

Addition/Change to the Contract Documents

The work provided for in this addendum shall become a part of the drawings and specifications for this project.

1. Will the City consider modifications to language in the Sample Professional Services Contract?

Response: The City is open to discussion of modification to the Professional Services Contract language. Any changes will need to be approved by the City Attorney.

2. Because of the proposed spans, it may be advantageous to consider the implementation of a site constructed bridge structure versus a premanufactured bridge. Is the City open to consideration of alternative structure types?

Response: The City is pursuing the use of a pre-fabricated bridge structure for the bridge structure portion of this project. For the purposes of the Professional Engineering Services RFP, use this criteria for your response.

3. Can you provide some clarification about what role, if any, the firm selected through this engineering RFP will play in selection of a Bridge type?

Response: Selection of the bridge structure is being performed under a separate RFP process. The selected engineering group will coordinate with the selected bridge structure provider, but will not be included in the selection of the bridge type.

4. Will the team selected under this RFP be responsible for participating in public involvement efforts? If yes, what level of services do you anticipate needing from the Team?

Response: For the purposes of this Professional Engineering Service RFP, it is not anticipated that the selected team will have any participation in the public involvement efforts.

This ADDENDUM shall be signed and attached to the Bidder's Proposal and shall subsequently become part of the Contract Documents.
