Basically how the SPL works is the applicant works with us directly and once they meet all of our requirements we issue them a permit. The issuance of the permit indicates that the plans submitted to us comply with our requirements.

Hi Tom,

I see the TVF&R 1-page SPL but no plans or other documentation. Can you clarify how the SPL should be used?

Normally we have a Condition of Approval that will require compliance with the Fire Marshall's Comments dated XX prior to XX.

Thanks,

Eric Rutledge

Eric,

Just a heads up for you, they went through our new process of a Service Provider Letter and have obtain a permit from us. So I will not have any additional comments. If they did not enclose it in their packet I can forward it over to you.

Thanks,

Hi all,

Willamette Water has submitted their land use application for the new treatment plant in Sherwood. We are requesting completeness comments by Thursday 10/1. *Do you need any additional information prior to issuing full land use comments?* The complete application will be routed again for full comments.

A dropbox link to the application is provided below. I've also routed paper copies to the City of Sherwood Engineering and Tualatin Valley Fire boxes here at City Hall.

Thanks and don't hesitate with any questions.
